# 1 Question 1

## Solution to Question No. 1 Part A

This contains a brief summary of the data, and its preprocessing, refer to the Jupyter Notebook output at the end of this for a complete study of data.

### 1.1 Data Cleaning: Redundant and Inconsistent Data

Column	Mean	Std	Min	Max	Skewness	Kurtosis
age	36.23	10.41	5	100	0.83	1.34
book_rating	2.83	3.85	0	10	0.75	-1.21

#### 1.1.1 Inconsistent Data

Figure 1-1 Book Ratings, before and after removing 0 ratings

Since 0 rated books don't make sense they were removed, after removing our skewness and kurtosis values have changed a lot.

Column	Mean	Std	Min	Max	Skewness	Kurtosis
age	36.23	10.36	5	100	0.85	1.64
book_rating	2.83	3.85	1	10	-0.66	-0.12

### 1.1.2 Univariate Analysis

Figure 1-3 Age univariate analysis

## 1.2 Data Cleaning: Missing Values and Outliers

Refer Jupyter Notebook for Cleaning up Missing Values

### 1.2.1 Outlier Analysis
